Connecting People and Nature: History, Education and Adventure

## **Public School Scholarship Application**

Canyonlands Field Institute believes that everyone deserves access to quality environmental education. We are committed to making our programs accessible and in doing so have created a scholarship fund especially for public/Indian Reservation schools. The Fund balance, generated each year by CFI donations and general support grants, provides total amount of underwriting that can be granted in a school year.

CFI now uses a tiered approach for "discounting" off the printed rack rates for our school programs. This approach is used by a number of outdoor education centers and is based upon the federal "Free and Reduced Lunch" program annual rating for the school as a whole (not based on students in your field trip group.) See current rates & discounts on our website.
